

# National Guide to the Registration of Regulatory Authorities and Food Establishments Outside the United Arab Emirates

First Edition

## Scope of work and application

The provisions of this guide apply to accredited food establishments outside the UAE that export food to the country. This document specifies the requirements for registering food establishments outside the UAE based on a risk assessment, to identify potential food safety problems before products arrive in the country, and to determine the status of compliance of establishments with the requirements of regulatory authorities for food safety standards, ensuring that they supply safe food in accordance with the best international standards.

## Area

Registration of food establishments outside the country based on a risk assessment, including:

1. Meat and its products.
2. Fish, aquatic life and its products.
3. Milk and its products.
4. Table eggs and its products.
5. Honey and bee products.
6. Vegetables and fruits.
7. Grains and agricultural crops.

## Update periodicity

The guide is updated whenever necessary in accordance with global, regional or local developments.

## Terminology

For the purposes of implementing this guide, the following terms, words and phrases shall have the following meanings unless the context requires otherwise:

| Term                            | Definition                                                                                                                                                                                                                        |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Country                         | United Arab Emirates                                                                                                                                                                                                              |
| Ministry                        | Ministry of Climate Change and Environment.                                                                                                                                                                                       |
| Competent Authority             | The local authority responsible for food safety in each emirate.                                                                                                                                                                  |
| Registration of Regulatory Body | The approval granted by the Ministry of Climate Change and Environment to the regulatory body responsible for food safety and its sources (animal/plant) in the origin/exporting country to export a food product to the country. |

|                                    |                                                                                                                                                                                                                                                                                                                                                                                       |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Registration of Food Establishment | The approval granted by the Ministry of Climate Change and Environment to the food establishment to export its products to the country by the official regulatory body in the origin/exporting country after verifying its efficiency and compliance with the health and veterinary requirements and relevant technical requirements.                                                 |
| Food Establishment                 | Any permanent, temporary, fixed or mobile licensed legal entity (establishment) that carries out work related to food handling throughout the stages of the food chain.                                                                                                                                                                                                               |
| Food                               | Any raw, primary, manufactured or semi-manufactured material or part thereof intended for human consumption through eating or drinking, including beverages, bottled drinking water, pickles, spices, chewing gum, and any material used in the manufacture, preparation and processing of food, excluding cosmetics, tobacco or materials used only as drugs.                        |
| Regulatory Body                    | The official regulatory body concerned with food safety in the origin/exporting country.                                                                                                                                                                                                                                                                                              |
| Risk Assessment                    | Assessment of the likelihood of negative effects and the severity of their impact on consumer health based on scientific foundations and consists of identifying and describing the source of the risk in addition to assessing the extent of exposure to the source of the risk, and characterizing the risks.                                                                       |
| Conformity Assessment Body         | The body registered, accredited or accepted by the Ministry of Industry and Advanced Technology to carry out conformity assessment procedures in accordance with the applicable legislation in this regard, including testing and standardization laboratories, inspection bodies, competency testing bodies and certification granting entities to systems, individuals or products. |

## Objectives

This national guide aims to clarify the procedures and trading practices followed by foreign food establishments that export their food products to

the country through the official regulatory authority responsible for food safety in the country of origin/export, through the following:

- Ensuring the safety and quality of food exported to the country.
- Ensuring the import of food that is produced and traded in healthy conditions within establishments that apply health and veterinary standards and requirements and technical conditions related to food safety.
- Enhancing the flow of food exported to the country.
- Enhancing food control and identifying potential food safety risks before products arrive in the country.
- Determining the status of establishments' compliance with the requirements of regulatory authorities and food safety standards.
- Enhancing customs clearance operations for food products imported to the country to ensure support for acceptance or rejection decisions by the competent authorities in the country.
- Ensuring that food products imported to the country meet the requirements stipulated under Federal Law No. (10) of 2015 regarding food safety, UAE specifications, UAE technical regulations and related legislation.

### Registration Scope

1. Registration of the official regulatory body responsible for food safety in the country of origin/export.
2. Registration of the food establishment wishing to export to the UAE.

## Requirements for registering the official regulatory body

- The regulatory body responsible for food safety and its sources (animal/plant) must be from a country from which food imports and its sources are not prohibited for reasons related to the health and safety of the product and animal and plant health.
- The system for accepting the regulatory body to register its food establishments for export to the UAE in accordance with the following requirements:
  1. Availability of systems, legislation and regulations that are compatible with the requirements of Federal Law No. (10) of 2015 regarding food safety, and the relevant standard technical regulations.
  2. Independence of the regulatory bodies concerned with food safety and control in the exporting country, and the authority granted to them in a manner that ensures the neutrality of the application of relevant legislation.
  3. Documenting the procedures of the regulatory body concerned with food safety and control in a manner that enables verification whenever necessary and at any time.
  4. Availability of qualified human resources and logistical and technical requirements, while ensuring the continuity of providing appropriate qualification and training in a manner that ensures efficient inspection work.
  5. Documenting the health status of animal and plant wealth, food transmitted common diseases to humans and animals, and agricultural pests in an accurate and transparent manner, especially with regard to the procedures for reporting the outbreak of animal diseases in food-producing animals and plant pests to the relevant international bodies, and the official control procedures for the

import of food-producing animals and plants and their products in the exporting country, and the extent to which phytosanitary and animal health and care standards are applied so that they do not pose a risk to human health through food consumption, and the application of appropriate protective measures to safeguard food from sources of risk associated with surrounding environmental factors, agricultural production inputs and any other materials used in primary production, and providing any of this information whenever required.

6. Countries wishing to export food to the UAE must have an effective system and control plans applied to food prepared for this purpose in accordance with the following:

6.1 Residue control plans in food of animal origin, including residues of chemicals or/veterinary medicines or/and other prohibited or/and controlled contaminants (residue control plans) to ensure their compliance with the UAE's requirements.

6.2 Plans for monitoring residues in foods of plant origin and their products, including the presence of official guarantees from the regulatory authority in the exporting country regarding the non-use or prohibition of certain types of chemicals used in the manufacture of those products in that country and/or related to the composition of those products and/or post-harvest practices.

6.3 Documented programs for tracking foods of animal and plant origin and their products throughout the food chain.

6.4 Implementing procedures for controlling food risks, including the presence of a food safety program based on the food safety management system or any approved food safety management system for food establishments wishing to export to the UAE.

7. Availability of conformity assessment bodies accredited according to international best practices in the country of origin/export to monitor chemical and biological food safety risks to ensure their compliance with UAE specifications.
8. Availability of procedures for controlling the safety of food materials in the event that they are not produced in the country of origin/export, ensuring that they comply with all health standards for food export to the UAE.

#### Procedures for registering the official regulatory body

1. Completing the regulatory systems evaluation form for registering the regulatory body in accordance with the attached Annex No. (1)
2. Fulfilling the requirements for studying the health status of the country of origin/export according to the diseases or pests associated with the type of product to be exported to the UAE.
3. Registering the health certificate forms for exporting food products that will be used when exporting to the UAE.

#### Requirements for registering the food facility outside the UAE

The official regulatory body approved by the Ministry must ensure that the food facilities wishing to export their products to the UAE comply with the following conditions and requirements:

1. The food facility must be under health and/or veterinary supervision by the official regulatory body.
2. The food facility must meet the health and quarantine requirements and conditions included in the health certificate forms approved for export to the UAE.

3. The food facility must implement the procedures for controlling food risks, including the existence of a food safety program based on the Hazard Analysis Critical Control Points (HACCP).
4. The facility must commit to implement the necessary procedures to verify the control of the health and safety of animals, the source of food products of animal origin, their nutrition and halal requirements in accordance with the procedures in force in the UAE, so that the food products are imported from sources subject to the control of the competent authorities in the country of origin/export.
5. The food exported to the UAE must meet the requirements of the relevant legislation in the UAE and the technical regulations or any conditions or standards included in any valid agreement with the exporting country.

#### Procedures for registering a food facility outside the UAE

1. The food facility submits a request to the official regulatory authority to include it in the list of facilities approved for export to the UAE if it meets the registration requirements.
2. Submitting a request to the Ministry to register the food facility, by the official regulatory authority in the country of origin/export in accordance with the attached Annex No. (2)
3. The Ministry includes the food facility in the list of facilities approved for export to the UAE if it meets the registration requirements.
4. The Ministry has the right to conduct surprise inspection visits, in coordination with regulatory bodies outside the UAE, to approved facilities and to re-evaluate registered facilities whenever it deems it necessary.

## Suspension of registration of food establishments outside the UAE

Registration of food establishments is suspended in the following cases:

1. Registration of diseases that must be reported according to the World Organization for Animal Health (WOAH) in animals that are the source of food and/or quarantine pests in plants that are the source of food in the country of origin/export, which does not guarantee the supply of safe products to the UAE.
2. Registration of a major food safety incident in the food establishment that affects the health of the consumer.
3. The food establishment/food establishment products do not primarily (major) meet the provisions and legislation, or repeated failure of the food establishment/food establishment products to meet the provisions and legislation secondary (non-major)
4. Registration of a major incident related to public health in the food establishment, for example, one of the workers contracting a major infectious disease that leads to contamination of food, its packaging or its means of transportation.
5. The area in which the establishment is located is affected by pollutants such as radioactive pollutants that may lead to contamination of food, its packaging or its means of transportation.
6. Based on a recommendation through the report of the technical team that conducted the field visit.

### Cancellation of registration of food establishments outside the UAE

The establishment's registration will be cancelled if its registration is cancelled in the country of origin/export or if it does not meet the health requirements and conditions.

### Powers of the Ministry

- The Ministry has the right to coordinate with the competent authorities regarding requests from the regulatory bodies from the exporting countries to register them through (joint meetings or/and evaluation visits or/and questionnaires, to evaluate the regulatory body and verify the requirements contained in this guide) through a national team of the competent authorities headed by the Ministry that is formed for the purposes of implementing this guide.
- The Ministry has the right to sign trade exchange agreements and rapid release of shipments with countries recognized by food safety measures within specific standards and procedures that ensure food supply facilities for the UAE and ensure food safety.

## QUESTIONNAIRE

### FOR

A desk study on FOOD SAFETY of countries from which  
Exporting of Food products into the UNITED ARAB EMIRATES

#### NOTE TO THE COMPETENT AUTHORITY

- This questionnaire should be completed and returned to Ministry of Climate Change and Environments officially through the Ministry of Foreign Affairs and International Cooperation
- the information requested should be sent electronically (word) to email [Foodsafety@moccae.gov.ae](mailto:Foodsafety@moccae.gov.ae)

From: \_\_\_\_\_

To: \_\_\_\_\_

### Food Safety Questionnaire

on Food Safety of countries from which Exporting of Food products into the United Arab Emirates

#### Instructions:

1. Complete the questionnaire.

2. Return it to Ministry of Climate Change and Environments officially through the Ministry of Foreign Affairs and International Cooperation.
3. Email the completed form to [Foodsafety@moccae.gov.ae](mailto:Foodsafety@moccae.gov.ae)

From: Competent Authority in [Exporting Country]

To: Ministry OF Climate Change and Environment in United Arab Emirates
