Issued [Click here to enter date.](#)

The Government prescribes¹ the following.

Chapter 1. Preliminary provisions

Section 1. This Ordinance contains provisions on invasive alien species.

The Ordinance complements Regulation (EU) No 1143/2014 of the European Parliament and of the Council of 22 October 2014 on the prevention and management of the introduction and spread of invasive alien species.

Section 2. The Ordinance is issued on the basis of

- Chapter 8, Section 4 of the Environmental Code in relation to Chapter 1, Section 5, Chapter 3, Sections 1-7, Section 9 and Section 10, second paragraph, Chapter 4, Section 13, Chapter 5, Section 3, Section 4, first paragraph and Section 8, Chapter 6, Section 4, Section 11, first paragraph, Section 12, first paragraph, Section 16, first paragraph, and Section 17, first paragraph, points 1 and 2, and second paragraph;
- Chapter 8, Section 11 of the Instrument of Government with regard to Chapter 6, Section 13, first paragraph, and Section 14, and
- Chapter 8, Section 7 of the Instrument of Government with regard to other provisions.

Section 3. For the purposes of this Ordinance, a *usufructuary* shall mean a person who has a special right to immovable property or who is responsible for the management of an area.

For the purposes of this Ordinance, *closed watercourse* means defined water without an outlet, such as small lakes, garden ponds and ponds.

Other words and expressions in the Ordinance have the same meaning as in Regulation (EU) No 1143/2014.

Section 4. The authority responsible under this Ordinance shall be:

- the Agency for Marine and Water Management for species living in water, and
- Swedish Environmental Protection Agency for species living on land.

¹ See Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 on a procedure for the provision of information in the field of technical regulations and of rules on information society services.

Section 5. The Annex to this Ordinance contains the national list of invasive alien species of importance for Sweden, which may be drawn up pursuant to Article 12(1) of Regulation (EU) No 1143/2014 (the national list).

SFS

Chapter 2. Species not included in the Union or national list

Species to be included in the Union list

Section 1. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, carry out the risk assessment referred to in Article 5(1) of Regulation (EU) No 1143/2014 in the cases referred to in the second subparagraph of Article 5(2) of the EU Regulation.

When carrying out a risk assessment, the competent authority shall give the authorities concerned the opportunity to comment.

Section 2. If a risk assessment shows that a species should be included in the Union list, the responsible authority shall submit the risk assessment to the Government together with information on:

1. how the criteria set out in Article 4(3) of Regulation (EU) No 1143/2014 are met; and
2. how inclusion in the Union list is consistent with the World Trade Organization's Agreement on Sanitary and Phytosanitary Measures.

Before the information referred to in the first paragraph, point 2, is submitted to the Government, the responsible authority shall give the National Board of Trade the opportunity to comment.

Species to be included in the national list

Section 3. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, propose to the Government:

1. which species should be included in the national list and what should apply to them; and
2. which species on the national list should be subject to enhanced regional cooperation pursuant to Article 11 of Regulation (EU) No 1143/2014.

For each species proposed pursuant to the first subparagraph, point 1, the responsible authority shall carry out the risk assessment referred to in Article 5(1) of Regulation (EU) No 1143/2014. The authority shall provide the reasons for assessing the species as an invasive alien species and for including it on the national list.

The proposals submitted pursuant to the first subparagraph shall include an impact assessment and an assessment of the proposal's compatibility with the World Trade Organisation's Agreement on Sanitary and Phytosanitary Measures.

Section 4. Before the responsible authority submits a proposal to the Government pursuant to Section 3(1), the authority shall give the Swedish Forest Agency, the Swedish Board of Agriculture and other relevant authorities the opportunity to comment. If the proposal can be assumed to have significance for reindeer husbandry or Sami culture, the Sami Parliament must also be given the opportunity to comment.

Section 5 of the Ordinance (1994:2029) on technical rules contains provisions on the obligation to consult the National Board of Trade on the drafting of technical rules.

Section 5. If the responsible authority considers that a forest tree species used for timber production should be included in the national list or be covered by enhanced regional cooperation, the Swedish Forest Agency shall draw up a proposal on what shall apply to the species on land covered by the Forestry Act (1979:429) and submit the proposal to the responsible authority. In its proposal to the Government, the responsible authority shall report on the Forest Agency's proposal, any differences between the authorities' proposal and the reasons for the proposals.

Species that should be subject to emergency measures

Section 6. If a situation as referred to in Article 10(1) of Regulation (EU) No 1143/2014 arises for a species that is not on the Union list or the national list, the Marine and Water Authority and the Environmental Protection Agency shall, within their areas of responsibility, inform the Government and propose which emergency measures in the form of prohibitions under Article 7(1) of the EU Regulation should apply to the species.

In accordance with Article 10(2) of Regulation (EU) No 1143/2014, the responsible authority shall inform the European Commission and the Member States of the European Union and carry out the risk assessment referred to in Article 10(3) of that Regulation.

Section 7. If a species referred to in Article 10(1) of Regulation (EU) No 1143/2014 cannot be included on the Union list but the situation otherwise is such that emergency measures should be taken, the responsible authority shall:

1. inform the Government thereof; and
2. take the necessary measures to allow the species to be included in the national list.

Chapter 3. Prohibitions, exemptions and authorisations

Prohibition of species on the national list

Section 1. Species that are included in the national list may not intentionally be:

1. brought into the country,
2. kept, even in closed storage,
3. raised, even in closed storage,
4. transported, except to a holding in the context of eradication;
5. placed on the market;
6. used or exchanged;
7. allowed to reproduce, grow or grow, including in closed storage; or
8. released into the environment.

General derogations for species on the national list

Section 2. The prohibitions in Section 1 shall not apply if the handling of the species is covered by a permit pursuant to Section 9.

Section 3. The prohibitions in Section 1 (2), (4) and (6) shall not apply to animals shown in animal parks if:

1. the animal was present in the zoo before the species was included in the national list; and

all appropriate measures have been taken to prevent the animal from being able to reproduce.

SFS

Section 4. The prohibitions in Section 1(2) and (4) shall not apply to species in commercial stocks for a period of one year from the date on which the species was included in the national list, if:

1. the species was in the possession of the holder prior to its inclusion on the national list;

2. the species is kept in closed storage; and

all appropriate measures have been taken to prevent the species from reproducing or escaping.

The prohibition in Section 1(5) also does not apply to the transfer of the species to someone outside Sweden's borders if the other conditions in the first paragraph are met.

Section 5. The prohibition in Section 1(7) on deliberately allowing species to reproduce or grow applies, in respect of occurrences of species on a property, only to owners or usufructuaries who are a state authority, municipality or region and who are entitled to take the necessary measures on the property to comply with the prohibition.

Other than state authorities, municipalities or regions shall take the necessary measures to prevent occurrences of terrestrial and aquatic species in closed water bodies on a property from spreading from the property if they, in their capacity as property owners or usufructuaries, are entitled to take such measures.

Species-specific derogations for species on the national list

Section 6. The prohibition in Section 1(1) shall not apply to *Cotoneaster divaricatus*. For the species, the prohibitions in Section 1(2) to (8) apply only in the counties of Gotland and Kalmar.

Section 7. The prohibitions in Section 1 shall not apply to:

1. seed sterile hybrids with *Rosa Rugosa*, or

2. specimens of *Phedimus spurius* and *Phedimus hybridus* used or to be used on sedum or vegetation roofs, where the roofs were established before or no more than three years after the species was included in the national list.

Prohibitions and derogations for species on the Union list

Section 8. Provisions on prohibitions concerning invasive alien species included on the Union list are laid down in Article 7(1) of Regulation (EU) No 1143/2014.

The same Regulation provides that, notwithstanding the prohibitions, species such as pet animals may be kept or commercially handled under specific conditions (Articles 31 and 32).

Permits for certain handling of species

Section 9. Authorisation for activities involving species included in the national list or subject to emergency measures may be granted for:

1. research or other scientific activities including subsequent medical use or ex situ conservation of species;

activities other than research and scientific activities, where necessary for overriding reasons relating to the public interest, including social and economic considerations; and

Import and import of *Homarus americanus*.

An authorisation referred to in points 1 and 2 of the first subparagraph may only be granted if the conditions set out in Article 8(2) to (3) of Regulation (EU) No 1143/2014 are fulfilled.

A permit may be subject to the conditions necessary for the management of the species.

Section 10. Under Chapter 24, Section 3 of the Environmental Code, a permit may, under certain conditions, be revoked in whole or in part.

An authorisation pursuant to Section 9, first paragraph, points 1 and 2, may also be revoked if the conditions laid down in Article 8(5) of Regulation (EU) No 1143/2014 are met.

Section 11. Provisions on permits and withdrawal of permits for activities involving species on the Union list are laid down in Articles 8(1), 8(5) and 9(1) of Regulation (EU) No 1143/2014.

Section 12. Issues relating to permits and the withdrawal of permits for activities involving species that are on the Union list or the national register or are covered by emergency measures shall be examined by the Agency for Marine and Water Management and the Environmental Protection Agency, within the respective areas of responsibility of the authorities.

The responsible authority shall make public the information on authorisations provided for in Article 8(7) of Regulation (EU) No 1143/2014.

Chapter 4. Measures against invasive alien species

Eradication measures

Section 1. The County Administrative Board shall adopt eradication measures for species that:

1. are included in the Union list and are not subject to management measures; or
2. are subject to emergency measures.

The County Administrative Board may decide on eradication measures for species included in the national list that are not subject to management measures.

The County Administrative Board is responsible for implementing the eradication measures.

Section 2. In the case of species subject to notification requirements pursuant to Article 16(2) of Regulation (EU) No 1143/2014, the county administrative board shall take measures in accordance with Article 17(1) of the Regulation and inform the responsible authority of the measures.

After early detection of the introduction or presence of species included in the national list or subject to emergency measures, eradication measures shall be taken as a matter of urgency.

Section 3. The county administrative board may entrust a municipality that requests it to be responsible within the municipality for the tasks that the county administrative board has under Sections 1 and 2.

Section 4. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, monitor the effectiveness of the eradication of invasive alien species and, where necessary, ensure that measures are coordinated nationally.

The responsible authority may, if necessary for effective eradication at national level, decide to take over the tasks of the county administrative board under Sections 1 and 2.

Derogations from the obligation to eradicate species included in the Union list

Section 5. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, assess whether species included in the Union list should be exempted from eradication on the grounds that one or more of the conditions laid down in Article 18(1) of Regulation (EU) No 1143/2014 are met.

If the Authority considers that a species included in the Union list should not be eradicated, it shall inform the Government thereof. The Authority shall also take the measures and decisions required under Article 18(1) and (4) of the EU Regulation.

Management measures

Section 6. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility in accordance with Article 19(1) of Regulation (EU) No 1143/2014, identify which of the species on the Union list are widely spread in Sweden and which are thus to be covered by management measures.

The responsible authority shall also identify which of the species included in the national list are not eradicable in all or part of the country and shall therefore be subject to management measures.

Section 7. The responsible authority shall investigate the management measures required under Article 19(1) to (3) of Regulation (EU) No 1143/2014 with regard to species included on the Union list that:

1. shall not be eradicated in accordance with Article 18 of Regulation (EU) No 1143/2014; or
2. is widely disseminated according to the Authority's assessment.

The responsible authority shall also investigate the management measures required for species on the national list which, in its opinion, cannot be eradicated in all or part of the country.

Section 8. The responsible authority shall report in a management programme on the management measures that apply to a species as a result of Section 7 and regulations issued pursuant to Chapter 6, Section 12. The programme shall be kept up to date.

Section 9. The County Administrative Board shall decide on and take management measures to the extent that follows from regulations and management programmes that apply to a species.

The county administrative board may entrust a municipality that requests it to be responsible within the municipality for the tasks that the county administrative board has under the first paragraph.

Section 10. In the case of management measures on land covered by the Forestry Act (1979:429) and relating to forest tree species used for timber production, what is said in Sections 7 and 8 on the responsible authority and what is said in Section 9 on the county administrative board shall instead apply to the Forest Agency.

Restoration measures

Section 11. The County Administrative Board shall decide on and take restoration measures in accordance with Article 20 of Regulation (EU) No 1143/2014.

The County Administrative Board shall also, pursuant to Article 20 of the EU Regulation, decide on and take restoration measures in respect of species included in the national list.

The county administrative board may entrust a municipality that requests it to be responsible within the municipality for the tasks that the county administrative board has under the first and second paragraphs.

Supervision

Section 12. Provisions on supervision are laid down in Chapter 26 of the Environmental Code and Chapter 2, Sections 6, 8 and 10 of the Environmental Supervision Ordinance (2011:13).

The supervisory authority shall carry out the inspections referred to in Article 8(8) of Regulation (EU) No 1143/2014.

Section 13. The County Administrative Board may, in connection with supervision, take charge of and retain a species that:

1. is included in the Union or national list; or
2. are subject to emergency measures.

If the county administrative board takes or keeps a species, the authority may, at the owner's expense, destroy, kill or take other measures necessary to prevent the introduction, or prevent or limit the spread of the species. The County Administrative Board may also decide to allow the owner of a pet animal to hand over the animal in accordance with Article 31(3) of Regulation (EU) No 1143/2014.

Section 14. The authorities' responsibilities and tasks under this Chapter also include land and water areas owned or used by other than state authorities, municipalities or regions, which are exempt from the prohibition on deliberately allowing species to reproduce or grow under Chapter 3, Section 5, first paragraph.

Authorities carrying out tasks under this Chapter may gain access to another person's land under the conditions laid down in Chapter 28, Section 1 of the Environmental Code.

Chapter 5. Official controls

Section 1. The National Food Agency shall carry out the checks referred to in Article 15(2) of Regulation (EU) No 1143/2014 for the categories of goods that:

1. are live animal foodstuffs for immediate consumption; or
2. shall be notified to the National Food Agency in accordance with regulations issued pursuant to this Ordinance or emergency measures adopted pursuant to Article 10(1) of Regulation (EU) No 1143/2014.

Section 2. The Board of Agriculture shall carry out the checks referred to in Article 15(2) of Regulation (EU) No 1143/2014 for the categories of goods that:

1. is subject to border control by the Authority pursuant to Regulation (EU) 2017/625 of the European Parliament and of the Council of 15 March 2017 on official controls and other official activities performed to ensure the application of food and feed law, rules on animal health and welfare, plant health and plant protection products, amending Regulations (EC) No 999/2001, (EC) No 396/2005, (EC) No 1069/2009, (EC) No 1107/2009, (EU) No 1151/2012, (EU) No 652/2014, (EU) 2016/429 and (EU) 2016/2031 of the European Parliament and of the Council, Council Regulations (EC) No 1/2005 and (EC) No 1099/2009 and Council Directives 98/58/EC, 1999/74/EC, 2007/43/EC, 2008/119/EC and 2008/120/EC, and repealing Regulations (EC) No 854/2004 and (EC) No 882/2004 of the European Parliament and of the Council, Council Directives 89/608/EEC, 89/662/EEC, 90/425/EEC, 91/496/EEC, 96/23/EC, 96/93/EC and 97/78/EC and Council Decision 92/438/EEC (Official Controls Regulation), or

2. shall be notified to the Board of Agriculture in accordance with regulations issued pursuant to this Ordinance or in accordance with emergency measures adopted pursuant to Article 10(1) of Regulation (EU) No 1143/2014.

Section 3. What applies to checks in relation to species on the Union list pursuant to Article 15(1) to (6) of Regulation (EU) No 1143/2014 and Sections 1 and 2 shall also apply to species on the national list.

Section 4. The National Food Agency and the Swedish Board of Agriculture may, in the context of checks under Article 15 of Regulation (EU) No 1143/2014 or Section 3, retain a species which:

1. is included in the Union or national list; or
2. are subject to emergency measures.

If the National Food Agency or the Swedish Board of Agriculture retains a species, the authority shall inform the authority responsible for the species as soon as possible in accordance with the division of responsibilities in Chapter 1, Section 4.

Section 5. Where species subject to an import ban pursuant to Article 7(1) of Regulation (EU) No 1143/2014 or Chapter 3, Section 1, point 1 are apprehended or detained, Swedish Customs shall notify the following as soon as possible:

1. the National Food Agency and the Swedish Board of Agriculture in accordance with the allocation of control responsibilities set out in Sections 1 and 2; and
2. the authority responsible for the species in accordance with the division of responsibilities in Chapter 1, Section 4.

Section 6. Live animals that are detained because they are subject to an import ban pursuant to Article 7(1) of Regulation (EU) No 1143/2014 or Chapter 3, Section 1, point 1 shall be kept in a holding that is acceptable from an animal protection point of view and that is designed and kept in such a condition that the animal cannot escape or reproduce.

Section 7. Plants and other organisms that are detained because they are subject to an import ban pursuant to Article 7(1) of Regulation (EU) No 1143/2014 or Chapter 3, Section 1, point 1 shall be stored in a place that is suitable for the plant or organism and that is established so that seeds, spores or viable parts cannot escape or reproduce.

Section 8. The National Food Agency and the Swedish Board of Agriculture may, in connection with checks or detention, destroy, kill, reject or take other measures at the owner's expense that are necessary to prevent the introduction, or prevent or limit the spread of a species that:

1. is included in the Union or national list; or
2. are subject to emergency measures.

Chapter 6. Other provisions

Species pathways

Section 1. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, take the measures for species' pathways required under Article 13 of Regulation (EU) No 1143/2014.

Before deciding to adopt or amend an action plan for a species' pathways, the authority shall give the Board of Agriculture, the Swedish Forest Agency and other relevant authorities the opportunity to comment. If the action plan can be assumed to be important for reindeer husbandry or Sami culture, the Sami Parliament must also be given the opportunity to comment.

Section 2. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, identify priority pathways for the species included in the national list and report these in an action plan.

Monitoring system

Section 3. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, ensure that a monitoring system as referred to in Article 14 of Regulation (EU) No 1143/2014 is in place. The monitoring system shall apply to species included in the Union or national list and to species subject to emergency measures.

Section 4. State authorities and municipalities that are responsible for or carry out environmental monitoring shall notify the responsible authority of prior encounters in the environment of species that are included in the Union list or the national list, or that are subject to emergency measures. The notification shall be made promptly in respect of occurrences of species that have previously been eradicated or have not been present in the country.

Obligation to provide information

Section 5. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, fulfil the notification and information obligation laid down in Article 16(2) of Regulation (EU) No 1143/2014 in the event of early detection of the introduction or presence of a species listed on the Union list.

Section 6. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, inform and inform the European Commission, other Member States and third countries to the extent provided for in Article 19(5) of Regulation (EU) No 1143/2014. If there is a significant risk that the dispersal of a species will affect Norway, Norway shall be notified.

Section 7. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency shall, within their areas of responsibility, fulfil the notification and information obligations laid down in Article 17(1) and (4) and Article 31(2) of Regulation (EU) No 1143/2014. The information provided pursuant to Article 31(2) of the EU Regulation shall also be addressed to the person who is not the owner of the animal.

Reporting to the European Commission

Section 8. The Environmental Protection Agency shall provide the European Commission with the information pursuant to Article 24(1) of Regulation (EU) No 1143/2014 and the implementing acts adopted by the Commission pursuant to Article 24(4) of the EU Regulation.

Section 9. The Swedish Agency for Marine and Water Management shall, within its areas of responsibility, provide the Environmental Protection Agency with the information it needs to provide information pursuant to Section 8.

Section 10. The County Administrative Board shall provide the information necessary for the responsible authority to fulfil its responsibilities under Sections 8 and 9.

Right to issue regulations

Section 11. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency may, within their areas of responsibility, issue further regulations on:

methods of eradication of invasive alien species and management of such species in the context of eradication measures;

2. restoration measures pursuant to Article 20 of Regulation (EU) No 1143/2014 or Chapter 4, Section 11;

3. the keeping of pet animals as referred to in Article 31 of Regulation (EU) No 1143/2014;

4. the display of animals in zoos in accordance with Chapter 3, Section 3, and

5. warehousing in accordance with Article 32 of Regulation (EU) No 1143/2014 or Chapter 3, Section 4.

The authorities shall give the Board of Agriculture the opportunity to comment before the publications are notified.

Section 12. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency may, within their areas of responsibility, issue regulations on:

1. management areas and management measures as referred to in Article 19 of Regulation (EU) No 1143/2014 for species included in the Union list that are widely spread in Sweden; and

2. management areas and management measures for species included in the national list.

The right to issue regulations does not apply to handling measures on land covered by the Forestry Act (1979:429) and which apply to forest tree species used for timber production.

Before issuing regulations, the authority shall give the Board of Agriculture, the Board of Forestry and other relevant authorities the opportunity to comment. If the regulations can be assumed to be important for reindeer husbandry or Sami culture, the Sami Parliament must also be given the opportunity to comment.

Section 13. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency may, within their areas of responsibility, issue regulations on the implementation of Chapter 3, Sections 9-11.

Before issuing regulations, the authority shall give Swedish Customs the opportunity to comment.

Section 14. The Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency may, within their areas of responsibility, issue regulations on the implementation of Sections 8-10.

Section 15. Before the Swedish Agency for Marine and Water Management and the Swedish Environmental Protection Agency issue regulations in accordance with this Ordinance, the authorities shall give each other the opportunity to comment.

Section 16. The Swedish Forest Agency may, with regard to management measures on land covered by the Forestry Act (1979:429) and relating to forest tree species used for timber production, issue regulations on:

1. management areas and management measures in accordance with Article 19 of Regulation (EU) No 1143/2014 for species included in the Union list that are widely spread in Sweden; and

2. management areas and management measures for species included in the national list.

Before issuing regulations, the authority shall give the Board of Agriculture, the Environmental Protection Agency and other relevant authorities the opportunity to comment. If the regulations can be assumed to be important for reindeer husbandry or Sami culture, the Sami Parliament must also be given the opportunity to comment.

Section 17. The National Food Agency may, in respect of the categories of goods which are live animal foodstuffs for immediate consumption, issue regulations on:

1. through the performance of official controls pursuant to Article 15 of Regulation (EU) No 1143/2014 or Chapter 5, Section 3, and

2. fees for such checks.

The Board of Agriculture may issue the rules referred to in the first paragraph concerning categories of goods other than live animal foodstuffs for immediate consumption.

Before issuing regulations, the National Food Agency and the Swedish Board of Agriculture shall give each other, as well as the Swedish Agency for Marine and Water Management, the Swedish Environmental Protection Agency and the Swedish Customs, the opportunity to express their views.

Public participation

Section 18. Provisions on public participation are laid down in Article 26 of Regulation (EU) No 1143/2014. Provisions on strategic environmental assessments can be found in Chapter 6 of the Environmental Code and in the Environmental Assessment Ordinance (2017:966).

Fees

Section 19. Provisions on fees are laid down in Ordinance (1998:940) on fees for examination and supervision under the Environmental Code.

Punishment and confiscation

Section 20. Provisions on penalties and confiscation are laid down in Chapter 29 of the Environmental Code.

Appeal

Section 21. Provisions on appeals are laid down in Chapter 19, Section 1 of the Environmental Code.

-
1. This Ordinance shall enter into force on 1 May 2026.
 2. The Ordinance repeals the Ordinance (2018:1939) on invasive alien species.
