

Digital Certificate Verification Methods

Following these steps

Smart devices:

- 1) Download any application for QR code reader or scanner

- 2) Run the QR code reader or scanner application, then scan the QR code on the last page of the certificate and choose Browse to open the link

- 3) The Digital Certificates and Permits Hub page is opened

- 4) Based on the certificate, enter the certificate number, verification code and the characters that appear like the picture below, and then click Submit

- 5) The original certificate is loaded, and the original certificate data can be compared with the accompanying certificate copy

Through the web:

The following address must be entered in the browser bar:

<https://eservices.moccae.gov.ae/digitalcertificates/certificateverification.aspx?lang=en-US>

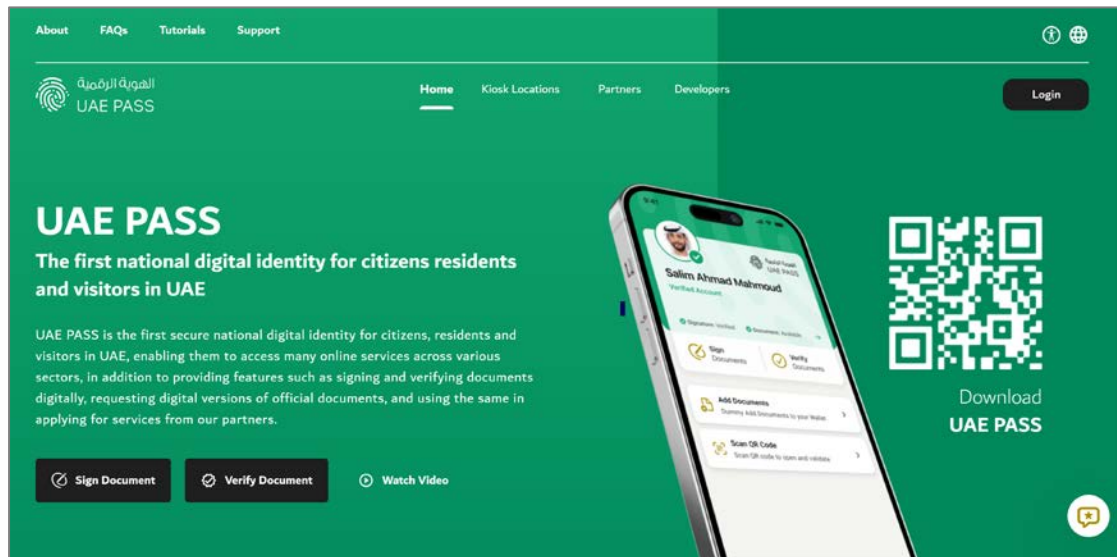

Enter the certificate number and the verification code, and then click on SUBMIT to proceed to the certificate.

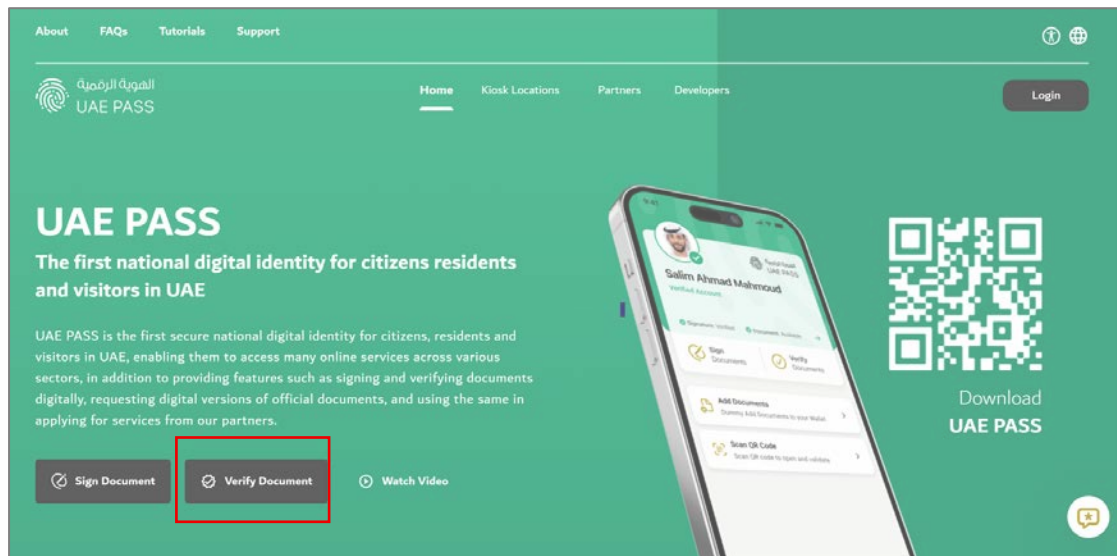

Through UAEPASS:

The following address must be entered in the browser bar:

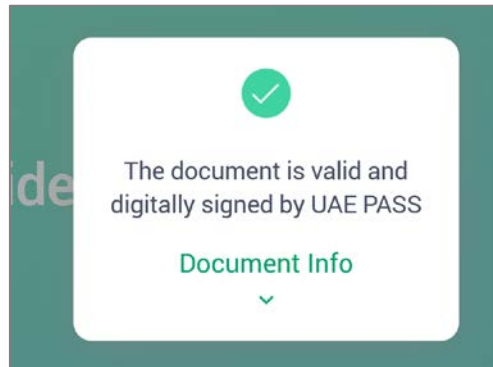

<https://uaepass.ae/>

1) Click on **Verify Document**.

- 2) Upload the **certificate**.
- 3) A pop-up message will appear confirming that the document is valid and digitally signed by UAE PASS.

- 4) For more information about the document, click on **More Information**.

The document is valid and digitally signed by UAE PASS
